Digital acquisition strategy  
Startup & PME - RS6479

Intro to Front-End Development

## Translating mobility strategy into **real adoption** — community, clients, field, data.

Hybrid project lead with **6+ years** delivering technical, field and stakeholder-heavy projects, backed by **12+ years** across design, systems and operations. Recently trained in digital growth and currently building a real-time mobility MVP in Île-de-France.

§01 What I bring to a mobility role

01 **Community building**

Trust, habit change, repeated usage and local activation — not just the app.

02 **Field + spreadsheets**

Combining user feedback, operational blockers and measurable KPIs.

03 **Client empowerment**

Comfortable with companies, authorities, suppliers and cross-functional teams.

04 **Adoption design**

Messaging, landing pages, activation journeys, tests, conversion thinking.

§02 Selected experience

Feb 2025 — Now

↳ Paris

**Founder & Developer — Mobility Startup Project**

OMW · On My Way •

- Designing and building a real-time mobility MVP focused on sustainable urban and peri-urban travel.
- Working across product architecture, UX, matching flows, geolocation logic, landing pages and field-test prep.
- Developing practical knowledge of driver/rider activation, trust, route habits and adoption friction.

Apr 2024 — Oct 2025

↳ Paris

**QHSE Coordinator — Paris 2024 Olympic Water Infrastructure**

MTD Water

- Coordinated field operations, compliance and reporting in a high-pressure, multi-stakeholder Olympic environment.
- Managed 1,900+ potability tests, strategic disinfection dispatching, waste monitoring and venue support tools.
- Monitored usage through 100+ smart meters, turning field data into operational visibility and decisions.

Dec 2020 — Apr 2024

↳ Paris

**Project Manager / Chargé d'affaires**

EUROPELEC — SFA Group

- Led technical projects from order acknowledgement to delivery — requirements, drawings, production and site work.
- Managed client communication, budget follow-up, after-sales dispatching and construction-team coordination.
- Built a strong systems-thinking approach: clarify constraints, structure execution, align stakeholders, deliver.

## §03 Additional experience

Mar 2019 — Dec 2020

### Technical Product Manager IDETEC Environnement

- Managed technical support and product-related work for civil engineering, sanitation conformity and acoustic solutions.
- Sole distributor contact for Plexiglas Soundstop PMMA panels across France, Belgium and Luxembourg.
- Contributed to R&D for low-height urban noise barriers and acoustic testing.

JuL 2012 — Dec 2020

### Freelancer Blokbergen

- Independent design, drafting and technical support work across varied assignments.

Jan 2015 — Nov 2017

### Draughtsman / Support Engineer APRO Industrie

- Principal draftsman using SolidWorks for large industrial tanks and equipment.
- Developed fabrication models and general arrangement drawings for multiple product families.
- Provided site support, client communication, production optimization and inventory coordination.

## §04 Early design / tech base

|             |                                             |                                  |
|-------------|---------------------------------------------|----------------------------------|
| 2011 — 2012 | Hardware Division Manager & Sales Assistant | Boxer Systems NL                 |
| 2011 — 2012 | IT Migration Assistant                      | CN-IT Eindhoven                  |
| 2010 — 2011 | Product Design Intern                       | Fonckel / Aesthetic Interactions |
| 2008        | Drafting & Product Development Assistant    | Intek Arredamenti                |
| 2005 — 2006 | Metalworking Assistant                      | Ferrofinesra S.r.l.              |

## §05 Capabilities

### ·01 Community & activation

Recruiting testers, gathering feedback, translating blockers into campaigns and product changes.

### ·03 Analytical execution

Read operational signals, usage patterns and KPIs, then turn them into concrete next actions.

### ·05 Digital growth mindset

Landing pages, SEO basics, acquisition loops, tracking, conversion and message testing.

### ·02 Stakeholder management

Clients, authorities, suppliers, operations teams and end users.

### ·04 Structured delivery

Planning, prioritization, budget awareness, process creation and follow-up discipline.

### ·06 Product literacy

UX, user journeys, MVP development, geolocation-based flows and real-world field validation.

"I can sit with clients, call users, build action plans, read the data, and keep pushing until adoption improves."
